Introduction		Contractual Exchange	62
Managing Risk	9	Participation Information	63
The Five Principles of Systems-Based Risk Management Planning	10	Information the client needs	63
		Information the organization needs	64
Chapter 1.1		Legal Release and Waiver Process	64
Risk, Risk Management and Safety	15	Do Waivers Work?	65
Traditional Risk Management Planning	16	Canada vs. The United States	65
Organizational Risk Tolerance	18	Safety Briefing, Orientation and Instruction	66
Systems Thinking: Incorporating a New Paradigm	19	The Briefing	68
Basic Features of a System	20	Activity Progression and Instructional Sequence	69
Risk Management and Systems Thinking	20	Program End and Contractual Release	70
		Follow up, Feedback and Return Business	70
Chapter 1.2		Legal Considerations	72
Legal Issues	23	Chapter 2.4	
Negligence	25	Equipment Management System	75
Defences to a Claim of Negligence	28	Procurement	75
Chapter 1.3		Control of Physical Resources and Equipment	79
Getting Started: Cycles and Core Process	31	Inspection	81
Core Process	32	Maintenance	82
		Retirement	84
Chapter 2.1		Chapter 2.5	
Organizational Planning System	39	Crisis Management System	87
Mandate & Philosophy	41	Crisis Definition	87
Mission & Identity	41	Roles & Responsibilities	91
Ownership & Governance	41	Resource Identification	91
For-profit ownership structures	42	Communication Plan	92
Not-for-profit ownership structures	44	Communication equipment	92
Governance	44	Communication flow	92
Risk Tolerance & Acceptable Exposure	45	Time frame	94
Decision Making & Leadership	48	Emergency Response Plan	94
Program Development	48	Public Information Management	94
		Business Continuity & Recovery	95
Chapter 2.2		Planning for restricted resources	96
Program Planning & Development System	51	Crisis Assessment & System Review	98
Determine Objectives	51	Chapter 2.6	
Establish Parameters	53	Staffing and Human Resources System	101
Identify Options	55	Position and Work Requirements	103
Develop Plan	56	Owner/Operator and Small/Medium Enterprises (SME)	103
Mapping the Core Process	56	Institutional Model	105
Examining System Interactions and Requirements	56	Contractors and Contracted Service Provider Model	106
Implement Trip/Program	56	Job Descriptions	106
Assess & Review	57	Recruitment and Vetting	107
Chapter 2.3		Hiring and Contracting	108
Client Information System	59	Hiring employees	110
Marketing Message	60	Contractors	110
		Induction and Orientation	110

Training	113	Step 3: Identify Existing Control Structures and Assess each as Limiting or Enabling	153
Training for competence	114		
Precision vs. Accuracy	114		
Training for expectations and accuracy	116	Practical Example—Client Info Phases and Control Structures	156
Training as investment	116		
Training models	117	Step 4: Restructure the Cycles and Control Structures to Create Routines that Meet Desired Standards	158
Performance and Accountability	117		
Setting performance standards	117		
Measuring performance standards	118		
Accountability to performance standards	118		
Professional Development	119	Chapter 3.2	
Succession & Continuation Strategy	120	Managing Systems	161
The problem with promoting from the field	120	Management	161
Termination and turnover	122		
Closing the cycle	122	Operating Environment Directs Management and Control Structures	162
Chapter 2.7			
Business Management System	125	Chapter 3.3	
Mission and Identity	126	Systems—A Better Way	167
Business Model	126	The Evolution of Adventure Risk Management	167
Income generation	127		
Program delivery model	128	Industry Standards and Evolving Risk Management	170
Excess revenue	131		
Strategic Market Placement	131	Implications of Evolving Risk Management Thought	170
Program Development	133	The Delusion of Learning from Experience	172
Financial management	133		
Financing day-to-day operations	134	Systems Create Events	174
Financial Management	136		
Access to capital	136	Appendices	177
Growth and Sustainability Strategy	136	Appendix A	
Growth strategy	136	Risk Management in the Field	177
Sustainability strategy	138		
Strategic Risk Management for Long-term Growth and Sustainability	139	Appendix B	
Program- or Product-Development Risk	139	HIRA: Hazard Identification & Risk Assessment	187
Target-Market Change Risk	140		
External Environment Transition Risk	141	Appendix C	
Competition	142	SCI: Systems Complexity Index	197
Brand Erosion Risk	142		
Addendum: Choosing a Contracted Service Provider	144	Appendix D	
Assumed vs. Examined Expertise	145	Using Systems to Analyse Accidents	213
Chapter 3.1		Appendix E	
Implementing Systems	151	A Case Study in Systems Failure	221
Step 1: Articulate the Vision, Mission and Risk Tolerance of the Organization	152		
		Appendix F	
Step 2: Conceptualize and Document the Cycles that Deliver the Product or Service	153	Insurance as a Part of Risk Management	221
